Mathematics (mæθɪmæ·tiks), *sb. pl.* [pl. of Mathematic B. 1. Cf. F. *les mathématiques* (fem.).

Gr. had the neut. pl. τὰ μαθηματικά in the sense of mathematical objects, principles, facts, etc., as well as the fem. ἡ μαθηματική mathematical science, Mathematic B. 1. The Fr. and Eng. use of the plural (known from the 16th c.) seems to have originated as an elliptic expression for 'mathematic sciences', and to have had at first no connexion with the Gr. use of the neuter plural. The analogy of names of sciences like *physics*, *metaphysics* (in which the pl. form is of Gr. origin) has, however, caused the sing. to be in English entirely superseded by the plural; in Fr., which has not the plural form in the other instances, the sing. *mathématique* survives in use as well as the plural.]

Originally, the collective name for geometry, arithmetic, and certain physical sciences (as astronomy and optics) involving geometrical reasoning. In modern use applied, (*a*) in a strict sense, to the abstract science which investigates deductively the conclusions implicit in the elementary conceptions of spatial and numerical relations, and which includes as its main divisions geometry, arithmetic, and algebra; and (*b*) in a wider sense, so as to include those branches of physical or other research which consist in the application of this abstract science to concrete data. When the word is used in its wider sense, the abstract science is distinguished as *pure mathematics*, and its concrete applications (e.g. in astronomy, various branches of physics, the theory of probabilities) as *applied* or *mixed mathematics*.

In early use always construed as a plural, and usually preceded by *the*. In recent use *the* is commonly omitted, and the sb. is almost always construed as a sing., exc. in *(the) higher mathematics*.

Matter (mæ'tər), *sb.*[1] Forms: 3–4 materie, 4 matery, 4–5 matiere, mate(e)re, matire, -yr(e, 4–6 -ir, 4–7 mater, matier, (5 mateer, mattir, 6 mattier, mattar, *Sc.* maiter), 5– matter. [ME. *materie, matere, matiere,* a. OF. *matere, matiere* (mod.F. *matière*), ad. L. *māteria* (also *māteriēs*), building material, timber, hence stuff of which a thing is made, subject of discourse or consideration, also (in philosophical use) 'matter' in contradistinction to 'mind' or to 'form'.

It has been conjectured that L. *māteria* represents a prehistoric **dmāteria*, f. **dmā-* (cf. Doric Gr. *νεο-δμᾱ-τος* newbuilt) related to the Indo-germanic root **dem-*, **dom-* (occurring, e.g. in L. *domus* house and Eng. TIMBER). The primary sense continued to be prominent in late popular Latin: cf. Sp. *madera*, Pg. *madeira* wood, and the derivative F. *merrain* timber:–late L. *māteriāmen* (Lex Salica, etc.). The sense-development of the word in Latin was influenced by that of the Gr. *ὕλη*, of which it was the accepted equivalent in philosophical use. In the derived senses the Latin word has been adopted in all the Rom. langs.: Sp., Pg., It. *materia*, Roumanian *materie*.]

The ceremony of washing the feet of poor persons on the day before Good Friday was instituted in commemoration of Christ's washing the apostles' feet at the Last Supper, and of his injunction that his disciples should in like manner wash one another's feet (John xiii. 14). The words 'A new commandment (*mandatum novum*) give I unto you, that ye love one another' (*ibid.* 34) from the discourse which followed the washing of the apostles' feet, were adopted as the first antiphon sung at the commemorative observance, which hence acquired the name of *mandatum.* (Hence OHG. *mandāt*, in Otfrid's paraphrase of John xiii. 12–14.) In later use, perh. owing to the currency of *dies mandati* (lit. 'day of the commandment') as a name for the day before Good Friday, *mandatum* frequently denoted the Last Supper itself.]

II. As an auxiliary of predication; with a following simple inf., or with ellipsis of this.

May shares with various other auxiliary vbs. (as *can*, *will*, *shall*) the characteristic that the inflected past subjunctive (though coinciding formally with the past indicative) retains its original functions. Like other past subjunctives, *might* is frequently used in a sense which differs from that of the present form not temporally but modally (partly corresponding to the 'present conditional' of Romanic grammar). The fact that *might* thus admits of three different meanings is sometimes productive of ambiguity, which has to be avoided by recourse to some different form of expression. Further, *may* agrees with certain other auxiliaries in having no pa. pple.; hence its pa. t. is used with a following perfect infinitive where logical correctness would require the plupf. tense (ind. or subj.) of the auxiliary followed by a present infinitive. Thus, in sense 3 below, *he might do* may be paraphrased either 'he was free to do' or 'he would be free to do'; and *he might have done*=either 'he had been free to do' or 'he would have been free to do'.

¶b. The pa. t. indicative in this sense (*he might* = 'he had opportunity to', 'it was possible for him to') is, exc. in actual or virtual obliqua oratio, now obsolete, on account of the tendency to interpret *might* as subjunctive. In poetry *might* was sometimes nearly equivalent to 'did'.

This use is strikingly characteristic of the style of Gibbon, as is also that explained under 5 c; it is often difficult to determine which of the two senses he intended.

¶ b. *Law.* In the interpretation of statutes, it has often been ruled that *may* is to be understood as equivalent to *shall* or *must*.

1728 SKINNER *K. B. Rep.* 370 For *may* in the Case of a publick Officer is tantamount to *shall*. 1782 ATKYNS *Chancery Rep.* III. 166 The words *shall and may* in general acts of parliament, or in private constitutions, are to be construed imperatively, they *must* remove them. 1873 BLACKBURN in *Law Rep.*, 8 *Q. c. In the 18th c. it was common to use *might be* or *do* in the sense of 'perhaps was' or 'did'. This is now rare.

The now current form *may have been* or *done* (5 d) is more logical, as the subjective possibility is a matter of the speaker's present.

8. As an auxiliary of the subjunctive mood.

a. Since the desire for an end involves the desire for the possibility of the end, *may* in seuse 3 in combination with an inf. is used, in clauses involving the idea of purpose or contemplated result, to express virtually the same meaning as the subjunctive of the principal verb. Hence this combination has come to serve as a periphrastic subjunctive, which has in ordinary prose use superseded the simple subjunctive in final clauses.

(*a*) in final clauses introduced by *that* or *lest*; also occas. with ellipsis of *that* (e.g. after *to the end*).

F. *maire* (from 13th c.):—L. *mājor* nom., properly adj., greater (see MAJOR). OF. had also a form *maor, meor*:—L. *mājōrem* acc., which may be represented in some of the ME. forms. The spelling *maio(u)r,* common in the 16th c., seems to be intended to represent the L. *major,* but as the *i* could be read as a vowel, this form became phonetically nearly coincident with those adopted from Fr. The substitution of *y* for *i* was in accordance with the orthographical habits of the 16–17th c., and need not be ascribed to imitation of the Sp. form *mayor.*

The med.L. *mājor* as a title was adopted as OHG. *meiur,* whence MHG. *meier, meiger,* mod.G. *meier* farm bailiff, farmer. Du. *meier* has both senses, 'mayor' and 'farmer'.]

1. The head or chief officer of the municipal corporation of a city or borough.

The title is used in England and Ireland (see also LORD MAYOR), in the British Colonies, and in the U. S. It was formerly borne by the heads of certain royal burghs in Scotland, but has there been long superseded by *provost.* It occasionally renders its etymological equivalent (F. *maire*) as the title of a similar municipal officer in French towns, though the Fr. word is now more commonly used; similarly, *mayor* was formerly used occas. to designate certain administrative officers in Holland and Switzerland (cf. MAYORALTY 3, MAYORY).

The continued practice of electing mayors in some decayed boroughs (e.g. Queenborough in Sheppey) which had become mere villages or hamlets is a common matter of jesting allusion in the literature of the 17th c. There are also in various parts of the country instances in which a so-called 'mayor' is or was elected periodically with burlesque ceremonies; of these mock-dignitaries the 'Mayor of Garratt', near Wandsworth, is the best-known example.

Meal, obs. form of Mail *sb.*[2]

-meal, *suffix*, forming advs. (all obs. exc. *piecemeal*), repr. ME. *-mele* (down to the 14th c. sometimes *-melum*), OE. *-mǽlum*. The OE. advs. in *-mǽlum* are in form the instrumental case plural of compounds of *mǽl* Meal *sb.*[2], in the sense of 'measure', 'quantity taken at one time', as in *cuclérmæl* spoonful (as a measure), the instr. pl. of which would be **cuclérmælum* by spoonfuls. The particular compounds of this formation actually recorded in the instr. pl., however, do not occur in the other cases, and already in OE. *-mælum* had come to be a mere suffix with the sense expressed in Latin by *-átim, -tim*, and in mod.Eng. by the repetition of the sb. preceded by *by*. Examples which existed in OE. are *dropmælum* Dropmeal, *flocemælum* Flockmeal, *fótmælum* Footmeal, *héapmælum* Heapmeal, *limmælum* Limbmeal, *scéafmælum* sheaf by sheaf, *stemmælum* turn by turn, alternately, *stundmælum* Stoundmeal, *styccemælum* bit by bit, *géarmælum* year by year. The suffix continued to be productive in ME., among the formations dating from that period being *cantle-meal, cupmeal, gobbetmeal, littlemeal, parcelmeal, pennymeal, piecemeal, poundmeal*, and the Latinisms *ravishmeal* (Wyclif) 'raptim', *table-meal* 'tabulatim'. A remarkable survival of the OE. inflexion appears in Wyclif's *hipyllmelum* (see Hipple). To the 16th c. belong *fitmeal, inchmeal, jointmeal, lumpmeal*; in later Eng. the suffix has not been productive, though nonce-words such as *pagemeal* have occasionally been formed, more or less playfully. A trace of the originally substantival character of the suffix remains in the use of *by piecemeal* as a synonym of the simple adv. (cf. the obs. *by flockmeal, by pennymeal*, etc.).

1493 *Festivall* (W. de W. 1515) 8 b, Hymselfe with his owone handes kest away the fleshe lompe mele. 1827 *Blackw. Mag.* XXI. 884 How pleasant it would be to tear it pagemeal, and fling it in the author's face.

Mean (mēn), *a.*[1] and *adv.*[1] Forms: 3 meane, 3–4 mene, 4–5 meen, 5 mean. [App. repr. (with normal loss of prefix) the earlier I-MENE, OE. *gemǽne* = OFris. *gemêne*, OS. *gimêni* (MLG. *gemeine*, MDu. *gemêne*, Du. *gemeen*), OHG. *gimeini* (MHG. *gemeine*, mod.G. *gemein*; Sw., Da. *gemen* from Ger.), Goth. *gamains*:—OTeut. **ga-maini-*, f. *ga-* copulative prefix (synonymous with L. *com-*) + **maini-*:—pre-Teut. **moini-* in L. *commūnis* (:—**com-moini-s*) Common *a.*

The pre-Teut. **moini-* is believed to be a ppl. derivative of the root **mei-, moi-* (as in L. *mūtāre* :—**moitāre*) to change, whence L. *mūnus* (:—**moinos*) reward, gift, and perh. (with the notion of change for the worse) OTeut. **maino-* wicked, Man *a.*

The primary sense of Teut. **gamaini-*, as of L. *commūnis*, is 'possessed jointly', 'belonging equally to a number of persons'. In OE., and in the early stages of the other Teut. languages, this was substantially the only sense; but in ME., as in Du. and Ger., it underwent a development corresponding to that of Common *a.*, so that it acquired the senses of 'ordinary', 'not exceptionally good', 'inferior'. In English this development was furthered by the fact that the native word coincided in form with the word adopted from OF. *meien, meen* (see Mean *a.*[2]) middle, 'middling', which was often used in a disparaging or reproachful sense. The uses in branch II below might be referred almost equally well to the native and to the foreign adj.; the truth is prob. that they are of mixed ancestry.

It is often supposed that the sense-development of the word has been influenced by OE. *mǽne* false, wicked (cogn. w. *mán* Man *sb.*[2] and *a.*); but this does not seem possible, as this adj. did not survive into ME., while the moral senses of *mean* do not appear before the mod.Eng. period.]

The W.Ger. **mainjan* is cogn. w. OFris. *mêne* opinion, OHG. *meina* fem., ? opinion (found only in Otfrid in certain phrases, *thia meina, bi thia meina*, etc., meaning 'verily', 'forsooth'). Outside Teut., the OSl. formal equivalent, *měniti*, exhibits an extraordinarily close parallelism of meaning, having all the varied senses of the OE. and OS. verb. The ultimate etymology and the order of sense-development are doubtful; the prevailing view that the root is **men-* to think (see MIND *sb.*) would account plausibly for all the recorded senses, but involves phonological difficulties that have not been satisfactorily disposed of.]

For other derivatives of the Teut. root **mas-, *mæs-*, expressing the notion of 'spot' or 'excrescence', see MAZER.

It is possible that the word may have come into Eng. from continental LG. For its existence in OE. there is no other evidence than the occurrence, in a 12th c. MS., of *mæsleceafe* as a spelling of *mælsceafa* MALSHAVE. The phonetic development is irregular: normally the modern form should be **mazel* (cf. HAZEL 1, for which spellings like *hesel, heasle* occur in the 15–16th c.). That the dialectal form *measle* appears in literary English may be due to a mistaken association of this word with MESEL leper; a similar confusion occurred in MHG., where *maselsucht* (etymologically 'measles') was often used for *miselsucht* leprosy.]

For the formation of the L. word cf. *officīna* (for **opificīna*), *ruina, rapīna.* There seems to be no sufficient ground for the common view that *medicina* is the fem. of an adj. *medicinus* used with ellipsis (in the three senses respectively) of *ars* art, *officina* workshop, *rēs* thing. The adj. occurs in late L., but otherwise only in one passage of Varro (in the phrase *ars medicina*), and its formation may have been suggested by the existence of the sb.

The disyllabic pronunciation (recognized by Johnson 1755) has existed at least from the 14th c., as occasional spellings indicate. The trisyllabic pronunciation is less common in England, and is by many objected to as either pedantic or vulgar; in Scotland and in the U. S. it is app. the prevailing usage; examples of it occur in verse of all periods, from the 14th c. onwards.]

4. Used to represent the terms applied in their native languages by North American Indians to denote any object or ceremony supposed by them to possess a magical influence; a spell, charm, fetish; sometimes = MANITOU. Hence used, by later writers, to express the same or similar meanings as current among other savage peoples.

As savages usually regard the operation of medicines as due to what we should call magic, it is probable that their words for magical agencies would often be first heard by civilized men as applied to medicine, and hence it would be natural that 'medicine' should be regarded as their primary sense.

The exact nature of the relation between the WGer. **mêda* and the OTeut. **mizdâ* is disputed. According to some scholars the former represents a Pre-Teut. type **mēizdhā* (ablaut-var. of **mizdhā*), the disappearance of the *z* being due to the long diphthong.]

The etymological sense is thus 'commensurate'.

OE. had *mǽte* adj. of similar formation without the prefix, but it occurs only in the senses 'small, inferior'. The formally equivalent ON. *mæt-r*, 'valuable, excellent, lawful', may possibly be the source of some of the Eng. senses. The alleged OE. *gemet* adj., sometimes assigned as the etymon, appears to be merely a predicative use of *gemet* sb., measure, what is fitting; and if the adj. existed its ME. form would not have had close *ē*.]

[Originally two distinct vbs.: (1) the intransitive strong vb. OE. *meltan* (pa. t. *mealt*, pl. *multon*, pa. ppl. *gemolten*); (2) the weak vb. (causative of the former) OE. *mieltan, myltan* (:—prehistoric **mealtjan*, **malljan*) corresponding to ON. *melta* to digest, to malt (grain), Goth. **maltjan* to dissolve, whence *gamalteins* vbl. sb., dissolution (transl. of *ἀνάλυσις* 2 Tim. iv. 6). In OE. the strong vb. was always intransitive; the weak vb. was normally transitive, but sometimes intransitive. In ME. the strong and weak inflexions were used indiscriminately, the former becoming gradually less frequent. In the 16th c. the strong pa. t. (in the form *molte*, from the analogy of the pa. pple.) was used *poet.* by a few writers, but was not generally current. The strong pa. pple. is now only poet. and rhetorical exc. as adj. (see MOLTEN *ppl. a.*), and even in that use is merely literary.

In classical Latin the sb. occurs only in the pl. *menstrua* (= sense 1). The development (in med. Latin) of sense 2 is to be explained by the fact that in alchemy the base metal undergoing transmutation into gold was compared to the seed within the womb, undergoing development by the agency of the menstrual blood. The medical writers spoke of the human fœtus as consisting of a 'spermatic' and a 'menstrual' part, derived from the two parents respectively; the alchemists employed this language in a transferred sense, the 'menstruum' with them being the solvent liquid. -ment (mĕnt), *suffix*, forming sbs. Originally occurring in adopted Fr. words in *-ment*, either representing Latin sbs. in *-mentum*, or formed in Fr. on the analogy of these by the addition of the suffix to verb-stems. The Latin *-mentum* was added to verb-stems, and the resulting sbs. sometimes expressed the result or product of the action of the verb, as in *fragmentum* fragment, and sometimes the means or instrument of the action, as in *alimentum* aliment, *ornāmentum* ornament. In late popular Latin, and hence in French, the suffix, while retaining its original functions, came (through sense-development in some of the older words) to be also a formative of nouns of action. In AF. the suffix was still more frequently employed than in continental OF. Of the many words in *-ment* adopted into English from French, some have concrete senses, as *garment*, *habiliment*; the majority are nouns of action, as *abridgement*, *accomplishment*, *commencement*. In most of the instances the Fr. verb has been adopted into English as well as the sb. derived from it. Hence the suffix came to be treated as an English formative. Early examples of its use as appended to native English verb-stems are *onement* (Wyclif's rendering of L. *unio*), and *hangment* (in the Promptorium *c* 1440 given as the equivalent of L. *suspendium*, *suspencio*). In the 16th c. the suffix was very freely added to English verb-stems, not only to those of Romanic etymology (as in *banishment*, *enhancement*, *excitement*), but also to those of native origin; examples of the hybrid formations of this period still surviving in use are *acknowledgement*, *amazement*, *atonement*, *betterment*, *merriment*, *wonderment*. Since the 16th c. many new derivatives in *-ment* have been formed from verbs of obvious French origin. Among verbs of native English etymology, those with the Romanic prefix *en-* (*em-*), and those with the native prefix *be-*, seem to have given rise to derivatives of this form with especial frequency: examples are *embankment*, *embodiment*, *enlightenment*, *entanglement*; *bedazzlement*, *bedevilment*, *bedragglement*, *bereavement*, *beseechment*, *besetment*, *bewilderment*. Of formations in *-ment* from other native verbs there are few instances since Shakspere's time. It is rarely that the suffix has been appended to any other part of speech than a verb, as in *funniment*, *oddment*.

The letter *y* (after a consonant) ending a verb is changed into *i* when the suffix is appended, as in *accompaniment*.
